Hapro roof boxes

■ More space, more fun

A roof box is the ideal solution when you need extra space when travelling, without having to compromise on travelling comfort. Whether you are planning an adventurous skiing holiday or a wonderful summer holiday with the whole family, thanks to the wide range of models available, there is always a Hapro roof box that suits your needs perfectly.

Let's start packing!

Enjoy a carefree journey ■ with a Hapro roof box

Designed and manufactured entirely in the Netherlands, Hapro roof boxes are renowned worldwide for their excellent quality and ease of use. The combination of modern design and innovative, intelligent features, as well as maximum attention to reliability and safety, guarantees optimum travelling comfort. Leaving you time to enjoy a great holiday.

Aerodynamic design

Hapro roof boxes offer plenty of space in a smart and intelligent aerodynamic design. The recessed base minimises air resistance and ensures a perfect fit between the car and the roof box.

Optimal ease of use

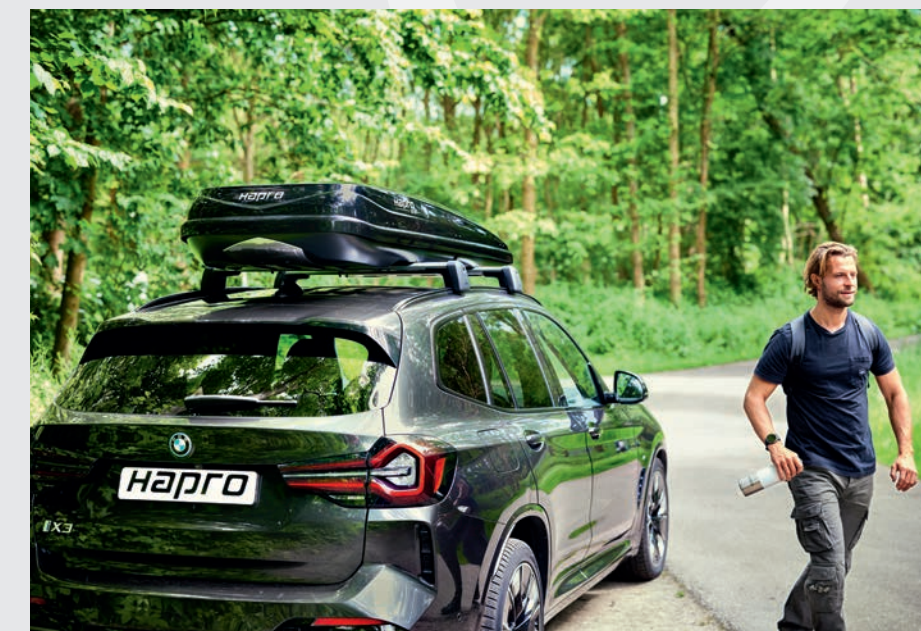

The combination of modern design and innovative, intelligent features makes every journey with a Hapro roof box a pure delight.

Made in the Netherlands

From idea to finished product, Hapro roof boxes are entirely developed and produced in the Netherlands and are known worldwide for their excellent quality and optimal user-friendliness.

Safety at its best

Hapro roof boxes are more than just an attractive addition to the roof of your car. Before we introduce a new roof box, it is subjected to a series of tests under the most extreme conditions. City crash tests, stability tests, vibration, water and wind tunnel tests: nothing is left to chance. All our roof boxes pass every test with flying colours and are therefore TÜV-certified.

Hapro Trivor

■ *Designing memories*

The Hapro Trivor is the ultimate outdoor roof box. An adventurous travel companion for all who believe no mountain is too high, no valley too deep. The design is sporty, contemporary and offers optimal ease of use - under all circumstances.

The Trivor is Hapro's next step in ergonomic design and ease of use. The innovative, centrally located automotive 'car handles' on both sides offer opening assist: the lid of the roof box is raised a few centimetres when it is unlatched. When the roof box is closed, the handle automatically retracts, and you hear a click when the roof box is securely latched. Keys? You don't need them for opening and closing. Only when you really want to lock the Trivor to keep out uninvited guests. Loading and unloading your luggage has never been easier.

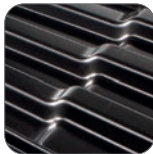

■ Technical specifications

Material and colour

Trivor is available in a range of colours. All Trivor models are available in stylish Brilliant Black and modern Anthracite. Trivor 440 and 560 are also available in the sturdy looking Supermatt Anthracite. The strong and impact-resistant material is highly UV-resistant, ensuring your roof box will retain its colour even in the most extreme conditions.

Reinforced bottom

The metal reinforcement rails along the entire length of the bottom provide strength and stability.

Mounting

The unique, patented Premium-Fit quick mounting system ensures a quick, secure and easy mounting of the roof box. A simple twist of the knob activates the clamps which grip securely around the roof bars.

Opening

Loading and unloading the Trivor is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Double-sided opening

The Trivor can be opened on both sides. An extremely comfortable feature, allowing maximum ease of use when mounting the roof box and when loading and unloading your luggage.

Ergonomic handle

Opening and closing the Trivor is effortless. The ergonomic handle ensures remarkably smooth operation. That way you always have one hand free when opening the roof box.

The handle activates a mechanism (opening assist) that lifts the lid a few centimetres. This makes opening the roof box a piece of cake. When closing the roof box, the handle automatically retracts, and you hear a click. This tells you with absolute certainty that the roof box is securely closed. Lid down. Click. Ready!

The innovative locking system allows you to close the box safely and securely. Without the need for a key. You only use it if you really want to lock the roof box.

Hapro Traxer

■ Room for adventure

The Hapro Traxer is a spacious and well-arched roof box, designed for enterprising and adventurous family getaways. With so many colours and sizes to choose from, there's always a Traxer to suit you and your travelling needs. Whether you are planning a relaxing summer vacation or an active skiing holiday with the whole family, the Traxer has everything you need for a great time. Combine this with its robust design and beautiful looks and you have an all-time favourite for anyone looking for a reliable roof box with the highest level of comfort.

■ Technical specifications

Material and colour

The Traxer is available in a variety of colours. All Traxers are available in the modern colour Anthracite. The Traxer 6.6 and 8.6 offer a wider choice of colours. These models are also available in Matt Silver Grey, Pure White and Brilliant Black. The strong and impact resistant ABS/ASA material of the Anthracite and Matt Silver Grey colours and the ABS/PMMA material of the Brilliant Black and Pure White colours are highly UV resistant, ensuring that your roof box will retain its colour even in the most extreme conditions.

Opening

Loading and unloading the Traxer is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Double-sided opening

The Traxer 4.6, 5.6, 6.6 and 8.6 can be opened on both sides. An extremely comfortable feature, allowing maximum ease of use when mounting the roof box and when loading and unloading your luggage.

Mounting

The unique, patented Premium-Fit quick mounting system ensures a quick, secure and easy mounting of the roof box. A simple twist of the knob activates the clamps which grip securely around the roof bars.

Central locking

The central locking system (two-point or three-point depending on the length of the model) locks the roof box securely and tightly in three places. You lock the Traxer with a simple turn of the key. As an extra safety measure, the key can only be removed when the roof box has been properly locked.

Reinforced bottom

The metal reinforcement rails along the entire length of the bottom provide strength and stability.

Hapro Cruiser

■ Overwhelmingly spacious

The Hapro Cruiser is a robust, incredibly spacious roof box with a stylish design. With an overwhelming capacity of more than 600 litres, you never have to worry about leaving anything behind. Struggling to choose? Not with the Cruiser. This roof box combines the best in safety and functionality and is the ideal solution when you need lots of extra luggage space but don't want to compromise on comfort. The Hapro Cruiser can easily hold 10 pairs of skis and accessories, and in summer you can easily transport your tent, beach equipment and inflatables. And with the Cruiser's sleek lines, you'll always arrive at your destination in style.

■ Technical specifications

Material and colour

The Cruiser is available in one colour, the modern Anthracite. The strong and impact-resistant ABS/ASA material is extremely UV-resistant, ensuring that your roofbox retains its colour even in the most extreme conditions.

Opening

Loading and unloading the Cruiser is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Double-sided opening

The Cruiser can be opened on both sides. An extremely comfortable feature, allowing maximum ease of use when mounting the roof box and when loading and unloading your luggage.

Mounting

The unique, patented Premium-Fit quick mounting system ensures a quick, secure and easy mounting of the roof box. A simple twist of the knob activates the clamps which grip securely around the roof bars.

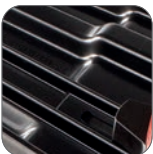

Central locking

The central three-point locking system locks the roof box securely and tightly in three places. You lock the Cruiser with a simple turn of the key. As an extra safety measure, the key can only be removed when the roof box has been properly locked.

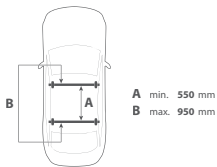

Reinforced bottom

The metal reinforcement rails along the entire length of the bottom provide strength and stability.

Hapro Zenith

■ Room for prestige

The Hapro Zenith is the sublime luggage-carrier for everyone who wants to merge extra space with sheer elegance. Nothing in this roof box will detract from the design of your car. Feel like going on a family ski vacation or a weekend of sailing with friends, the Zenith offers you all the space, safety and comfort that you need.

The combination of modern design, intelligent features, state-of-the-art materials and an eye for detail will immediately grab your attention. The Hapro Zenith has been made to shine. Its exciting smooth lines and aerodynamic shape are a true feast for the eyes, that match the latest trends in automotive design. The recessed base ensures that the car and roof box fit together beautifully for the perfect look.

■ Technical specifications

Material and colour

The Zenith is available in a range of colours. The Zenith 8.6 is available in Brilliant Black, Pure White and Anthracite. The Zenith 6.6 comes in Brilliant Black and Anthracite. The strong and impact-resistant material is extremely UV-resistant, ensuring that your roof box retains its colour even in the most extreme conditions.

Opening

Loading and unloading the Zenith is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Double-sided opening

The Zenith can be opened on both sides. An extremely comfortable feature, allowing maximum ease of use when mounting the roof box and when loading and unloading your luggage.

Aerodynamic design

The Zenith's low, aerodynamic shape is designed to cut through the wind.

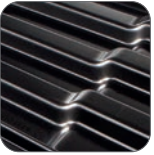

Front

The aerodynamic, edgeless front of the roof box is reinforced with a metal cross profile for extra rigidity.

Reinforced bottom

The metal reinforcement rails along the entire length of the bottom provide strength and stability.

Diffuser

The rear of the Zenith is a real eye-catcher. The stainless steel diffuser has an inverted V-shape: a nice complement to the lines of the V-shape in the lid. The unique design and premium materials create a distinctive and extremely elegant look.

Mounting

The unique, patented Premium-Fit quick mounting system ensures a quick, secure and easy mounting of the roof box. A simple twist of the knob activates the clamps which grip securely around the roof bars.

Central locking

The central three-point locking system locks the roof box securely and tightly in three places. You lock the Zenith with a simple turn of the key. As an extra safety measure, the key can only be removed when the roof box has been properly locked.

Hapro Nordic

- *Perfectly aerodynamic and deliberately low*

The aerodynamic appearance of the Hapro Nordic conceals the outstanding spatial capacity of this roof box. The Nordic offers the best of both worlds, with a low-level design that is both attractive and practical, ensuring that you can effortlessly enter most car parks.

The sleek and efficient design of the Hapro Nordic makes it highly aerodynamic. The flat shape is designed to cut through the wind and, together with the recessed base, reduces drag and wind noise. This also makes the Nordic the ideal model if you want to leave your roof box on your car for longer periods of time.

■ Technical specifications

Material and colour

The Nordic is available in one colour, stylish Brilliant Black. The strong, impact-resistant, high-gloss ABS/PMMA material is highly UV-resistant, ensuring that your roof box retains its colour even in the most extreme conditions.

Opening

Loading and unloading the Nordic is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Double-sided opening

The Nordic can be opened on both sides. An extremely comfortable feature, allowing maximum ease of use when mounting the roof box and when loading and unloading your luggage.

Hapro Rody

■ Room for everyone

Taking extra luggage is great, as long as you can be assured of a solid and safe solution. And that is exactly what you get with the Hapro Rody. The Hapro Rody is constructed from carefully selected solid and attractive UV- and impact-resistant ABS/ASA materials. In addition, the Rody is nestable, which means that the base of the roof box fits inside the lid. Not only does this save storage space, it also reduces CO2 emissions because the roof box is transported in its nested, space-saving mode. A valuable investment in convenience and the environment.

■ Technical specifications

Material and colour

The Roady is available in the colour Anthracite. The strong and impact-resistant ABS/ASA material is extremely UV-resistant, ensuring that your roofbox retains its colour even under the most extreme conditions.

Space-saving design

The Hapro Roady roof box is nestable, which means the bottom fits upside down into the lid. This not only saves storage space, but the box is also transported to you from the factory in this spacesaving mode, thus contributing to cutting down on CO2 emissions.

Opening

Loading and unloading the Roady is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Mounting

Thanks to the tried and tested Standard-Fit mounting system, the roof box can easily be mounted on to every roof rack up to 56 mm wide. Using the handy U-bracket and two safety nuts that can be tightened from the inside of the roof box, you can fasten your extra luggage space securely on to the carrier. A solid construction for a carefree journey!

Mounting systems

■ Quick, easy and reliable

Premium-Fit

The patented Premium-Fit quick-fit system makes it easy to fit the box to your car's roof bars. This simple system consists of a complete unit, eliminating the need for separate brackets and accessories. A simple twist of the knob activates the clamps which grip securely around the roof bars.

Convenient is the reassuring ratchet noise, which tells you exactly when the clamps are fitted tight enough and the roof box is securely fixed to the roof bars. Push the button to secure and you are safely on your way.

The roof box is attached to the roof carriers with four Premium-Fits that can be shifted separately. Each one centers itself on the roof bar, which makes the Premium-Fit a perfect fit for any roof rack system with a maximum width of 95 mm. The clamps are covered with a synthetic material for extra grip and to protect the roof rack. For mounting on aluminium roof racks, a T-slot adapter is available.

Mounting

Thanks to the tried and tested Standard-Fit mounting system, the roof box can easily be mounted on to every roof rack up to 56 mm wide. Using the handy U-bracket and two safety nuts that can be tightened from the inside of the roof box, you can fasten your extra luggage space securely on to the carrier. A solid construction for a carefree journey!

Discover accessories

■ For the full Hapro experience

Get the most out of your roof box and make mounting, storing and loading easier with Hapro's practical roof box accessories.

Roof box bag set

Make the most of the space in your roof box with the Hapro roof box travel bag set. This four-piece set consists of three standard bags and a special nose bag. The set fits perfectly in the Traxer 6.6, Zenith 6.6 and Trivor 440, but can also be used in a smaller or larger model. In this case, you can carry one less bag in the roof box or have convenient space for loose luggage.

Roof box cover

Protect your roof box from dirt, scratches and damage during storage with this practical roof box cover. Available in sizes L (max. 195 cm), XL (max. 220 cm) and XXL (max. 235 cm). Not sure what size cover your roof box needs? The sizes of our roof boxes are easy to find in the technical specifications.

T-slot adapter Premium-Fit / Master-Fit

Are your roof bars not suitable for the Premium-Fit or Master-Fit mounting system of Hapro roof boxes? The alternative is a T-slot adapter for the Premium-Fit and Master-Fit systems. This adapter is suitable for aluminium roof racks with a T-profile and makes it possible to mount a roof box on roof racks that are wider than 90 mm or higher than 38 mm.

Roof box suspension system

Save space in your garage or storage area and easily hang your roof box from the ceiling with this roof box lift.

Five-year warranty

- *A service you probably won't need*

Hapro demands the absolute best when it comes to materials and production processes. Everything is thoroughly checked to meet the high production standards. Therefore Hapro can guarantee the optimum quality of its products. You can rely on full service, secured within the five-year warranty. On the Roady, the warranty period is three years.
